

Daminion is a multi-user, digital photo/digital video and document management program created to meet the needs of media professionals tasked with archiving, accessing and editing large numbers of graphic, photo, video, audio and text files – as fast as possible. This manual describes the commands and menus of the Daminion interface. It also provides step-by-step guidance to carrying out specific tasks. If you have any questions, please navigate through the chapters on the right or use the search option to quickly find the answers to your questions.
