

Printing images

Printing one image per page

In the Browser window, select the image or images you want to print, and in the File menu navigate to **File -> Print** or press **Ctrl+P**.

On the left of the pane, select the printer and set print options such as page size, margins, or number of copies.

Each image is printed on a separate page. If you have selected more than one image for printing, you can to switch back and forth between images using the arrow buttons under the layout preview.

Printing Contact Sheet

If you want to print more than one image per one page or want to print an image with the metadata information, use the function “Creating a contact sheet in PDF”.
